

Announcing the industry's first and ONLY 1344W battery workstation!

Unleash the power!

POWER you have been waiting for,
Safety you have come to expect in a **CELLPRO** product.

REV LECTRIX™

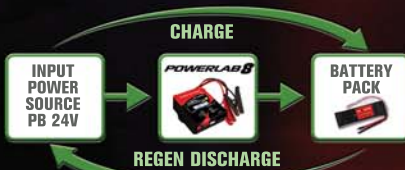

KEY FEATURES OF CELLPRO POWERLAB 8

- Charge, discharge, monitor, and perform multiple cycles
- Log and Graph all major operations when using free Charge Control Software (CCS)
- Support for all current and future battery chemistries
- Selectable charge rates range 10mA to 40A
- Selectable discharge rate range 10mA to 10A/40A (ext discharge)

KEY FEATURES OF CELLPRO POWERLAB 8

- Charge power rating, 1344W @ +24VDC input voltage, 612W @ +12VDC input voltage
- Discharge power rating 100W (internal), 1344W (external regenerative), see illustration below left
- Smart power management protects input supplies
- Node-only operation option available

ENVIRONMENTALLY FRIENDLY REGENERATIVE DISCHARGE

Stop wasting energy, put it back into your input battery
